

## STRATOPANEL (UFF)

- Acoustical panels for screw-fixing
- Suitable as lining for walls and ceilings
- Installed on steel (CD2)
- Jointing required

## CONDITIONS OF USE

- For internal fitout of buildings
- To be installed in a closed-off building

## STORAGE

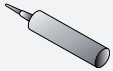

The products must be:

- stored indoors clean and dry
- positioned on a level base
- protected from direct moisture
- stored at humidities of less than 70% RH and temperatures of less than 50°C
- protected from impact and shock
- stacked max. 2 pallets on top of each other

Before installation, please ensure that fixtures to primary construction can withstand the load of the ceiling.  
Best Practice: Use of clean cotton gloves when handling product tiles will ensure a good result and a ceiling without fingermarks.

## RECOMMENDED ACCESSORIES FOR JOINTING AND FIXING

Below accessories are tested and approved for use in connection with Stratopanel.

	PRODUCT NAME	SAP NO.	SIZE	Consumption per m <sup>2</sup>
	 Screw SN3.5x30	3503	3.5 x 30 mm	20 pcs.
	 Knauf Tiefengrund (Universal Primer)	253759	5 L	0.02 L
	 Uniflott Finish	129801	8 kg	0.4 kg
	 Knauf Uniflott	253631 253630	25 kg 5 kg	≤ 0.1 kg
	 Filler tube set	4707		
	 Filling knife	73962		

Accessories for jointing and fixing

# INSTALLATION GUIDE STRATOPANEL

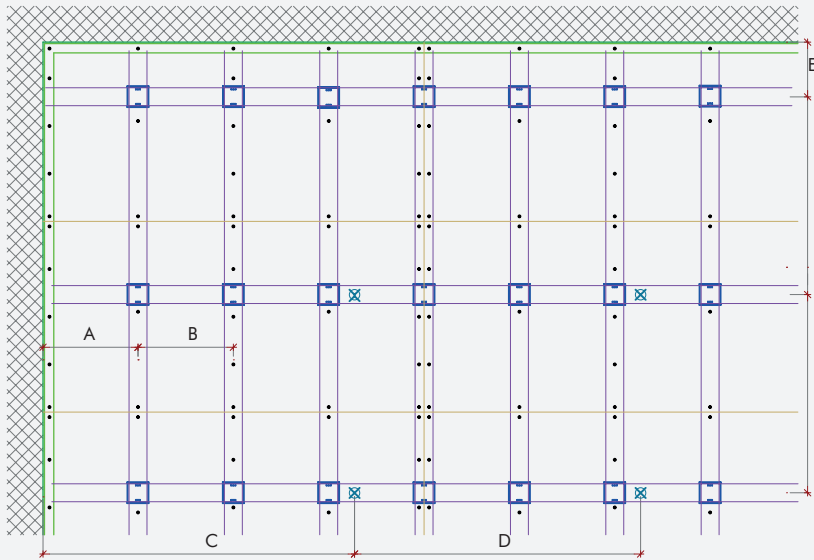

## RECOMMENDED ACCESSORIES FOR STEEL FURRING SYSTEMS

Below accessories are tested and approved for use in connection with Stratopanel.

	PRODUCT NAME	SAP NO.	SIZE	Consumption per m <sup>2</sup>
Accessories for CD system - for installation on ceiling	 Primary / secondary CD 60/27-profile	3294	60 x 4000 x 27	4.6 m
	 Wall angle UD 28/27	181589	28 x 3000 x 27	depending on room size
	 Length connector CD 60/27	181080	59 x 80 x 28	1.1 pcs.
	 Cross-fitting	3446		3.3 pcs.
	 Split pin for hanger	198907		2.6 pcs.
	 Nonius hanger lower	198904		1.3 pcs.
	 Nonius hanger upper 85mm	198905	125 - 185	1.3 pcs.
	Nonius hanger upper 135mm	198906	135 - 235	
	Nonius hanger upper 235mm	198923	235 - 340	
	Nonius hanger upper 340mm	198924	340 - 440	
Nonius hanger upper 440mm	198925	440 - 540		
Nonius hanger upper 540mm	198926	540 - 640		
Nonius hanger upper 640mm	198927	640 - 740		
Nonius hanger upper 740mm	198928	740 - 840		
Nonius hanger upper 840mm	198929	840 - 940		
Nonius hanger upper 940mm	198930	940 - 1040		
For installation on walls	 Z-profile	199089	30 x 45 x 45 x 2300	

# INSTALLATION GUIDE STRATOPANEL AS CEILING LINING

## CEILING LAYOUT

### Legend:

-  Wall profile UD 28/27
-  CD profile 60/27
-  Cross fitting
-  Nonius hanger (type depending on installation depth)
-  Panel edge
-  Screw SN 3.5 x 30

- A = Max. 300 mm
- B = Max. 333 mm\*
- C = Max. 900 mm
- D = Max. 900 mm
- E = Max. 150 mm
- F = Max. 1000 mm
- G = Min. 80 mm

\* Is to be adjusted and fitted according to the exact length of the panel (please note that the size of the panels varies depending on the type of perforation).

## INSTALLATION OF PANELS

### CEILING LAYOUT

- Divide the ceiling surface from the centre of the room or in accordance with the existing ceiling plans.
- Please note that expansion joints must be established on extensive ceiling surfaces at max.intervals of 15 metres in both directions. See detailed drawings on knaufdanoline.com.
- Where conditions indicate an increased risk of movement in a building, this must be taken into account by reducing the distance between expansion joints.

### WALL PROFILE

- Mark out.
- Install the wall profile UD 28/27. Choose the method of fixing in accordance with the substrate.

### HANGERS

- Secure the upper part to the construction above it at 900 mm c/c. Choose the fixings in accordance with the substrate.
- Secure the lower part to the primary profile.

### PRIMARY PROFILES

- Connect the two parts of the hangers with two split pins, one immediately above the other.

## INSTALLATION GUIDE STRATOPANEL AS CEILING LINING

### JOINING CD-PROFILES

- Join the CD profiles with the help of length connectors.

### SECONDARY PROFILES

- Place a cross fitting on the primary profile.
- Press the underlying secondary profile into it.
- Adjust the locations of the secondary profiles and lock the cross fitting.

### INSTALLATION SEQUENCE

- Begin installation in the centre of the room.
- The longitudinal direction of the panels must be 90° to the furring. Be certain that all short ends of the panels are fully supported.

### INSTALLATION

- Use a string or a laser to ensure that the perforation rows are flush. Note: The panels must all face in the same direction: **red mark against blue mark**.
- Make sure that the screws are countersunk without damaging the cardboard surface.

### CUTTING

- Cut the elements to size from the front with a fine-toothed saw.
- Prime the edges with Knauf Tiefengrund (universal primer).

### FILLING

- Check that the screws are undersunk and that the panels are not pushed close together.
- Check that the edges have been primed and are free from dust.
- Use Knauf Uniflott for filling.
- To avoid filler in the perforation holes a marking paper can be used. Use a sensitive type and test beforehand that it does not damage the surface of the panels when removed.

## INSTALLATION GUIDE STRATOPANEL AS CEILING LINING

### PREPARING KNAUF UNIFLOTT FILTER

- Prepare the filler according to the instructions on the filling package. We recommend you mix the filler by hand, as mixing with machine may speed up the hardening process.
- Fill the tube with joint filler with the help of a putty knife.
- Attach the jointing nozzle.
- Insert the tube and nozzle into a jointing gun.

### FILLING

- Fill the joint with filler (Knauf Uniflott). Use a jointing gun or press the filler into the joint with a filling knife. Overfill slightly and make sure that the filler is pressed all the way up between the edges of the panels and avoid getting filler in the perforations.
- Press the filler up again by running a finger over the joint. Fill again.
- Allow the filler to dry for about 45 minutes.
- Remove surplus filler.
- Allow the filler to dry.
- Apply the second layer of filler (Knauf Uniflott Finish). Overfill slightly.
- Allow the filler to dry.

### FILLING SCREW HOLES

- Apply the filler (Knauf Uniflott Finish). Overfill slightly. We recommend the use of Knauf Danogips „Acoustic filling knife for holes“ in order to avoid filler getting into the perforation holes.
- Allow the filler to dry.

### SANDING

- Make sure that the filler is completely dry.
- Sand with fine sandpaper until the surface is completely smooth. Be careful not to damage the cardboard surface.

### PAINTING

- Make sure that the filler is completely dry and the surface is smooth and free from dust.
- Priming should be carried out in accordance with the paint manufacturer's instructions.
- Apply the paint with a roller so that the acoustic felt on the perforated panels is not sealed. Use a fine mohair roller.
- Make sure that the paint is not too thick and avoid applying too much paint at a time.

# INSTALLATION GUIDE STRATOPANEL AS WALL LINING

## WALL LAYOUT

A = Max. 333 mm    B = Max. 200 mm    C = Max. 333 mm

## INSTALLATION OF PANELS

### LAYOUT

- Perforated wall panels are normally installed on the upper section of a wall in accordance with acoustic requirements and the shape of the room in question.
- However, perforated panels can also be used to surface an entire wall depending on the degree of physical impact.
- Please note that expansion joints must be established on extensive ceiling surfaces at max. intervals of 15 metres in both directions. See detailed drawings at [knaufdanoline.com](http://knaufdanoline.com).

### INSTALLATION

- Install the panels so that they all face in the same direction (**red mark against blue mark**).
- Install the first row with the help of string.
- Fasten panels with Screw SN3.5x30.

### CUTTING

- Cut the elements to size from the front with a fine-toothed saw.
- Prime the edges with Knauf Tiefengrund (universal primer).

### FILLING

- Check that the screws are countersunk and that the panels are not pushed close together.
- Check that the edges have been primed and are free from dust.
- Use Knauf Uniflott for filling.
- Prime the edges with Knauf Tiefengrund (universal primer).
